Course Synopsis

Have you ever been stumped by a lack of ideas and initiatives at a personal or organizational level? Do you or your team members find it a challenge to come up with innovative solutions for the challenges you are facing? In our course, we will teach you how to effectively tackle problems with innovative solutions and ideas.

In the modern workplace, employers are looking for creative individuals who can come up with novel ideas to solve problems faced in a typical day or to overhaul outdated work procedures that has led to systemic productivity decline. Employers value individuals who can channel creativity into productive solutions, especially those whose ideas can potentially lead to long term cost savings or new business opportunities.

This workshop will introduce simple steps for you to discover your personal creativity, change your thinking in order to release your creative potential and to use creative problem solving tools to resolve issues that you or your organization is facing.

Whether it be products or services or simply to enhance our productivity, this workshop will help you to harness your creative potential for maximum benefit.

Course Objectives

By the end of the course, you would be able:

- Enhance your work environment and generate new ideas
- Appreciate the different aspects of left and right brain thinking
