Course Synopsis

Most people spend more than one-third of their lifetime at work and it is important that they can find happiness and meaning in their careers.

By understanding the science behind career happiness and applying appropriate career tools, we can find happiness and meaning in what we do at work.

It is a belief that happier career leads to happier life. Participants are requested to submit their birthdate (in confidential) for Bazi analysis of suitable career choices.

Course Objectives

By the end of the course, you would be able to:

- Understand the DNA of happiness
- Appreciate the science of happiness in career
- Use profiling tools to find a happy career that suits your personality
- Apply job crafting to increase career happiness
- Manage work stress
- Plan your career for the future of work

Course Outline
