## Course Synopsis

Have you always wanted to build your own website for your personal or business branding but backed off because you think you lack the technical skills to do so? What if we tell you that you can build a website without needing to know HTML or other forms of web coding?

In our 1-day 'Website Design & Development course', we will guide you to create your own functioning, attractive and professional-looking website with free software and no web coding involved.

Do not underestimate the importance of having a website. By creating an online presence through your website, you will be able to reach more consumers. The more consumers you reach online, the more opportunities you have to make sales to scale your business.

## Course Objectives

By the end of the course, participants would be able to:

- Plan for an appropriate site architecture
- Create a functioning, attractive and professional-looking website without coding
- Apply web design concepts to create and edit functional web pages
- Add, edit and manage website assets
- Upload the site you have built to the web server
