GENERATIVE AI FOR DIGITAL MARKETING

Course Synopsis

This course teaches you to use Generative AI tools — such as **ChatGPT**, **Canva AI**, and **Gemini** — as productivity accelerators across your digital marketing workflow. It is designed for marketing professionals, content creators, and business owners looking to work faster and smarter with AI.

You will learn prompt engineering to generate fit-for-purpose marketing copy, create AI-powered visuals aligned to campaign tone, and adapt content for platform-specific constraints across Instagram, LinkedIn, TikTok, email, and more. The course also covers the **4Ps marketing framework** with GenAI support, multi-channel campaign planning, KPI tracking and performance analysis, and ethical AI use through the **F.A.I.R. framework**.

Building on foundational content strategy skills, this course focuses on how to leverage AI to execute marketing campaigns faster while maintaining quality, brand consistency, and ethical standards.
