IT TROUBLESHOOTING AND PROBLEM SOLVING

Course Synopsis

This course provides participants with essential knowledge and practical skills to troubleshoot common IT issues in the workplace. Participants will learn how to identify, analyse, and diagnose hardware, software, network, and application-related problems using appropriate tools and techniques. Emphasis is placed on root-cause analysis, task prioritisation, and effective problem resolution to **minimise operational disruption**.

Participants will also develop an understanding of network components, connectivity troubleshooting, and methods to improve network performance. In addition, the course addresses security-related concerns by equipping learners to identify threats, implement appropriate responses, and support a secure and reliable IT environment.
